Experience

Software Engineer at 100 Devs Agency | Los Angeles, CA
January 2023 - Present
- Collaborated with a team of developers to build responsive **Full-Stack** web applications using technologies such as **React**, **Node.JS**, **Express,** and **MongoDB.**
- Developed and optimized websites using **SEO** best practices for visibility on search engines.
- Applied **Agile** methodologies like **SCRUM** for project management.

Recent Projects:

Smile Supply - smilesupply.net
Algorithmic Dental Inventory Tracker
- Developed an algorithmic dental inventory tracker called Smile Supply, leveraging **React** for the frontend and **Express.js**, **MongoDB** with **Mongoose** for the backend.
- Utilized **Passport.js** for **Google OAuth 2.0** authentication, enhancing user security.
- Integrated user sessions and serialization for seamless user login/logout.
- Built the user interface using **React**, **Zustand** for state management, **date-fns** library for handling date-related operations. and **Axios** for server communication.

Web Developer at Consultant | San Jose, CA
October 2023 -Present
- Collaborated directly with customers to determine pain points in their jobs and deliver customized solutions.

Recent Projects:

Victoria's Mexican Restaurant
victoriasmexicanrestaurantgilroy.com
- Addressed a client's needs to develop a **React** application using **SEO** best practices resulting in increased traffic and new customer acquisition.
- Revamped various user-facing features to increase revenue, improve management and optimize performance.

Software Engineer at DMD Developers
April 2023 -Present
- Collaborated with a team of 15 developers utilizing **Agile Scrum** methodologies with **Jira** to create a backlog, gather velocity, and perform **unit testing.**
- Delivered an MVP for the startup by collaborating with the team to understand the business requirements accurately with an entrepreneurial mindset.
- Participated in architecting the product roadmap with the product management team.
- Peer-reviewed all pull requests actively with a new set of eyes to find potential risks and be on the same page with team members.
- Covered 95% of the codebase with automated unit testing using **Jest** and **Vitest** to guarantee the quality of the product.

Dental Hygienist at Various Locations
2014 -Present
- Increased productivity by 100% through strategic workflow optimization, leading to increased company growth and retention of clientele.
- Cultivated a personal brand by providing exceptional customer service, being detail-oriented, and fostering genuine relationships resulting in retaining a clientele of hundreds.
